

H301

Electric gynecology armchair

Characteristics

Armchair specifically designed for gynaecology and urology examinations.

Highest quality upholstery, very easy to clean. Fire retardant and antibacterial, resistant to urine, blood and disinfectant products, specially recommended for its use in hospitals.

The armchair is equipped with 3 motors, which can be easily actuated by the patient or the sanitary staff. These three motors allow to actuate the following movements: height adjustment (550 - 900 mm), independent reclination of the headrest and footrest, or simultaneous movement of head and footrest for Trendelemburg position (12°)

Backrest with adjustable pillow for greater patient comfort.

Cut-out seat specially designed for gynaecology with a stainless steel waste tray under seat.

Anatomical upholstered legrests that can be tilted, adjusted in height and oriented manually and fixed by hand knobs.

Four double \varnothing 100 mm swivel castors, all of them with brake, for easy movement.

Structure and Finishings

Structure protective cover made of shockproof ABS.

Structure made of epoxy coated steel.

Accessories

Paper roll holder included. There are a wide range of accessories to complete the armchair's functionality (IV pole, handles, trays, etc.)
